Digital Ethics

Spring 2026 Edition
15.5.2026

Programme 15.5.2026

Jesse Haapoja

Matti Nelimarkka

Final Presentation - What?

- Students completing the 5 ECTS version will develop a group presentation in groups of 3-4 students.
- Choose a topic that is clearly connected to the themes of the course.
- Your group should define a focused viewpoint or question and explain why it matters ethically.
- The goal is to demonstrate understanding, critical analysis, and the ability to connect theory with concrete cases.
- No original research is required, but your presentation should be informed by relevant academic and/or professional sources.
- Use your own words, cite sources clearly, and avoid plagiarism or copy-paste from source material.

Final Presentation - How?

- Form your group and agree on a shared topic of interest, division of work, and presentation structure.
- MyCourses has a dedicated discussion thread for forming groups
- Prepare a concise presentation with clear argumentation, examples, and references.
- Each group member should contribute to both preparation and presenting.
- You may draw on personal or professional observations, but keep the presentation analytical and relevant to digital ethics.
- Your submissions are made visible to other students in MyCourses.

- **Submission open: 18.5.2026**
- **Deadline: 5.6.2026 end of day**

Final Presentation - Format & Deliverables

01

FORMAT

- Slide deck (default, ~15–20 slides)
- Short paper (~3,000-4,000 words)
- Interface prototype or app
- Or a combination of these

02

SOURCES

- Minimum 5 credible sources
- Mix: peer-reviewed, regulatory, journalism, technical docs
- Cite consistently (APA, IEEE...)
- Use your own words - declare any AI use

03

SUBMIT

- Artifact (slides / paper / link)
- Video, max 5 minutes, everyone involved
- Contribution statement: who did what

Final Presentation - Grading Criteria

30%

Analysis

Clarity of the ethical question, depth of reasoning, engagement with counter-arguments.

20%

Originality

Your group's lens; a fresh angle, a new synthesis, a concrete case, a useful framework.

25%

Background

Quality and integration of sources; literature used to build the argument, not just decorate it.

25%

Presentation

Communication, pacing, visual clarity; every member contributes to the delivery.

Each criterion graded 1–5. Weights indicative.

Final Presentation - Example topics

Responsibility in Algorithmic Power: the Ethics of Assigning Accountability in Digital Spaces

Ethical Reflections on Bias in Medical AI

The Ethics of Video Game Monetization

Tackling bias in algorithms – how the development process should be improved to prevent discrimination

The causes, ethics, and implications of attention economy induced digital addiction in children

Generative AI and Human Mental Health

Exploring Deepfakes: Uses, Ethics and Solutions

Ethics of Automated and Robotic Warfare
